Teaching-student interactions: Measurement, impacts, improvement, and policy

Presented by
Robert C. Pianta, PhD

Robert Pianta, PhD, is Dean of the Curry School of Education and Human Development, Novartis US Foundation Professor of Education, Professor of Psychology, and founding director of the Center for Advanced Study of Teaching and Learning at the University of Virginia. An internationally recognized expert in both early childhood education and K-12 teaching and learning, Dr. Pianta has advanced conceptualization and measurement of teacher-student relationships and documented their contributions to students’ learning and development. He has led research and development on measurement tools and interventions that help teachers interact with students more effectively and that are used widely in the United States and around the world.

Konover Auditorium, Dodd Center
Wednesday, March 25
11:00 am - 12:00 pm
